

RF 400 SHF1 - Solid

Low loss feeder cable

Double shielded

50Ω

SHF1, UV

DNV

Application

Replaces RG-8/9913 as short run antenna feeder or jumper assemblies. Connects RF receiver systems with antenna systems in ships, buildings, tunnels and other underground installations. This product has better bending and handling properties, compared with cables with corrugated sheaths. Equal to LMR 400.
